Gujarati

## PROFILE

I am a Backend Developer with expertise in both frontend and backend development, focused on delivering high-quality, scalable, and user-friendly solutions. I specialize in building responsive applications that enhance performance and user experience. My goal is to continuously expand my skills and contribute to innovative and efficient digital solutions.

## EXPERIENCE

### Backend Developer

Pixer Digital | Dec 2024 – Present

I gained experience in Next.js, React.js, TypeScript, Contentful, Apollo Server, GraphQL, and SEO while working on live projects like Fello, Pause, and Copilot. I managed data using Contentful and developed a task management system with project creation, task assignment, and role-based access control. Additionally, I implemented task archiving and restoration to enhance functionality and user experience.

## PORTFOLIO

### Portfolio

My portfolio features a diverse range of projects, showcasing expertise in both frontend and backend technologies. It includes work with HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Node.js, MongoDB, and more. These projects highlight my ability to build responsive, scalable, and user-friendly applications.
